

Yard Waste Removal Restriction and Disclosure Form

Directions for Use

- ✓ Fill your bag with yard waste, soils, concrete and building materials only. Concrete must not contain steel or rebar reinforcement. No hazardous waste should be in the bag. Please call (613) 336-2345 for any questions
- ✓ Take care of your bag; although it is strong, sharp objects should not go in the bottom of the bag
- ✓ Position the bag in its final pick up location and use it like a dump bin. Any attempt to move it once filled can result in damage to the bag or personal injury. The bag will be collected by a truck with a Hiab boom which requires minimum of 10 feet of clearance, both width wise and height wise. Your signature below accepts the risk and responsibility for our truck to enter your property for the purpose of collecting the yard waste bag
- ✓ Fill the bag to a maximum of 1 ton (2000 lbs). As a guide, that would be approx. 2/3 full of heavy soil
- ✓ We reserve the right to refuse collection if the bag is positioned beyond the access of our Hiab truck, if our operator cannot gain access to the bag in a safe manner, if the bag is overloaded, torn or contains anything other than yard waste. If collection is refused for any of these reasons, you may not be entitled to a refund
- ✓ Any bags found to contain unapproved materials upon inspection at our collection depot will result in additional disposal charges

Declaration of Non-Hazardous Goods

I declare my bag meets the requirement for collection and does not contain hazardous waste material

Name: _____

Date: _____

Signature: _____

Complete the above declaration and place inside bag pouch
